# Privacy Policy

Version 2.4 · Last updated 19 November 2026 · Effective from 19 November 2026

**The short version**

- **Your birth details never leave your device.** Your kundali is calculated on your phone, or in your browser when you use the web app. Your name, date, time and place of birth are not sent to us.
- **No account, no ads, no tracking.** Vedharish needs no sign-in, shows no advertising and contains no advertising or analytics trackers. We do not sell or rent personal data, ever.
- **When you ask a question,** the question and a set of chart facts (planet positions, houses, dashas) go to our answer server and our AI provider to write the answer. We do not store them.
- **Voice is optional.** A spoken question is turned into text and the recording is not kept. "Read aloud" turns the answer into audio that our server holds for 10 minutes.
- **If you buy the yearly pass,** Razorpay takes the payment. We never see your card, UPI or bank details. Razorpay shares your email, phone number, the amount and the payment ID with us, and we keep that payment record for as long as tax law requires.
- **Everything optional starts switched off:** saving your questions, morning alerts and family charts. Switching one off deletes what was kept under it.
- **Other people's charts** (family members, a partner for matching) are added only with their permission and stay on your device.
- **You stay in control:** correct, delete or withdraw at any time in Privacy (at the top of the Today screen), or write to our Grievance Officer at girish@vayura.ai.

## 1. About this policy and who we are

This Privacy Policy explains how personal data is handled when you use the Vedharish web app at app.vedharish.com, the Vedharish mobile app for Android and iPhone, the website at vedharish.com, and the answer, voice and read-aloud servers that support them (together, the "Services").

The Services are provided by Vayura Global Ventures LLP, a limited liability partnership registered in India under the Limited Liability Partnership Act, 2008, with LLP Identification Number (LLPIN) ACZ-9474 and registered office at C/O Padam Singh Rawat, Village Majeda Khatta, Garkote Malla, Salt, Almora – 263676, Uttarakhand, India, and office at 55, Westend Marg, Lane-2, Saidulajab, Saket, Delhi – 110030, India (near Saket Metro Station) ("Vedharish", "we", "us", "our"). For the personal data described here, we are the **Data Fiduciary** under the Digital Personal Data Protection Act, 2023, and a body corporate under the Information Technology Act, 2000.

This policy is written to meet:

- the **Digital Personal Data Protection Act, 2023** ("DPDP Act") and the **Digital Personal Data Protection Rules, 2025** ("DPDP Rules"). The Rules were notified on 13 November 2025 and most of their obligations take effect on 13 May 2027; we follow them now;
- the **Information Technology Act, 2000** and the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 ("SPDI Rules"), which continue to apply until the DPDP Act fully replaces them;
- the **CERT-In Directions of 28 April 2022** on cyber-security incidents and logs; and
- the user-data policies of the Google Play Store and the Apple App Store.

The app shows a short notice of each purpose in your chosen language, one of 12 Indian languages, before it asks for your consent. You can also ask us for this full policy in English or in any language listed in the Eighth Schedule to the Constitution of India, and we will provide it.

Please read this policy together with our Terms and Conditions.

## 2. How Vedharish is built to protect you

Birth details and questions of faith are among the most private things a person can share. We designed Vedharish so that as little as possible ever leaves your phone:

- **On-device calculation.** Your kundali, divisional charts, dashas, panchang, vrat calendar and matching scores are all calculated on your device: on your phone in the mobile app, or in your browser in the web app. In the mobile app they keep working offline.
- **No account.** You do not create an account or give us a phone number or email address to use the app.
- **Data minimisation.** When you ask a question, the app sends the question and the chart facts needed to answer it. Your name, date, time and place of birth are not sent, and neither are the names of family members or a partner.
- **Nothing stored on our servers.** Our answer server does not save your questions or answers and does not write request contents to its logs.
- **Off by default.** Every optional use of data starts switched off and can be switched off again at any time.
- **No advertising or analytics trackers.** The app contains no advertising, no advertising identifiers and no third-party analytics or tracking software.

## 3. What we process, and where it is kept

| Data | Where it is kept | When it leaves your phone |
|---|---|---|
| **Your birth details**: date, time and place of birth, the coordinates and time zone worked out from them, whether the time is known, and your name if you give it | Only on your phone | Never |
| **Your chart**: planet positions, signs, houses, nakshatras, dignities, aspects, divisional charts, dasha periods, Manglik and Sade Sati status | Calculated on your phone | A summary ("chart facts") is sent with each chart question so the answer can be based on your chart |
| **Questions you type or speak, and the answers** | On your phone. Kept after you close the app only if "Save my questions" is on (the latest 50) | Each question is sent to our answer server and AI provider to write the answer. Not stored by us |
| **Recent conversation**: your last 3 questions and answers | On your phone | Sent with a new chart question only if "Save my questions" is on, so the answer can follow the conversation |
| **Voice recordings**: up to about 30 seconds, only while you hold the mic | Not kept after transcription | Sent to our server and speech provider to turn speech into text |
| **Read-aloud audio** | On our server, in memory only, for up to 10 minutes | The answer text is sent to our speech provider to create the audio |
| **Family members' details**: name, relation and birth details of people you add | Only on your phone, and only while "Keep family members' charts" is on | When you ask about a member, their chart facts and a relation word (for example "mother") are sent. Never their name or birth details |
| **A partner's details for matching**: optional name and birth details | In your phone's memory only. Cleared when you close the app or start a new match | When you ask about the match: the partner's chart facts and the match scores, never the name or birth details |
| **Settings and consent record**: app and answer language, chart style, panchang city, your consent choices and when you made them | Only on your phone | Never |
| **Panchang city** | Only on your phone. You choose it from a list; the app does not read your phone's location | Never |

| Data | Where it is kept | When it leaves your phone |
|---|---|---|
| **Japa counts**: which mantra you count, beads per round, counts per day, and any goal you set | Only on your device | Never. "Delete my account and data" erases them |
| **Mantra recordings** you play | Downloaded from our server to your device when you press Listen | Only the standard technical data of any request (below). We do not record which mantras you open or play |
| **Morning alerts** (mobile app only) | Scheduled by your phone itself | Never. We do not use a push-notification server or collect notification tokens |
| **Technical data**: IP address, time of request, app or browser version, the address requested, response status | On our servers: the IP address in memory only, as a one-way hash that changes every day, for up to 24 hours to apply usage limits; and in security logs | Collected when the app or website talks to our servers. Logs never contain your question, answer or audio |
| **Yearly pass purchase**: your email address and phone number, your name if you give it, the amount, date and payment method type, and the payment and order IDs | With Razorpay, our payment provider, which shares this record with us; and in our accounts | When you pay. Your card, UPI or bank details go only to Razorpay and its banking partners; we never see them |
| **Your pass**: a code signed by our server that holds the payment ID and the end date | On your device | Sent with each question to show that you have a pass. Not stored on our servers |
| **Restoring a pass on another device**: the email and payment ID you enter | Not kept | Sent to our server, which checks them with Razorpay and then forgets them |
| **Free-answer counter**: a random number and how many free answers were used, signed by our server | On your device | Sent with each question. It is not linked to you, your name or any device identifier |
| **Messages you send us**: your email address and what you write | In our email system | When you email us |
| **Website visits**: standard web-server records, and cookies set by our website platform (section 17) | With our website host, GoDaddy | When you visit vedharish.com |

**In the web app,** everything this policy describes as kept "on your phone" is kept in your browser's storage for app.vedharish.com, on the device you are using. It is not sent to us. Clearing that site's data in your browser, or tapping "Delete my account and data", erases it.

**Chart facts are still personal data.** They do not include your name or your birth date, time or place. But planetary positions are unique to a moment in time, so someone with technical skill could work out an approximate birth time from them. We therefore treat chart facts as personal data and protect them in the same way as everything else in this policy.

**What you write in a question is sent as written.** Questions can reveal your faith, health, relationships or worries. We treat every question as confidential and never use it to profile you. Please do not include other people's names, phone numbers, ID numbers or bank details in a question; the answer does not need them.

## 4. What we do not collect

- Account details. There is no sign-in, so we hold no password. We have your email address and phone number only if you buy a pass (from Razorpay) or write to us.
- Your contacts, photos, files, call logs, SMS messages, calendar or other apps' data.
- Your precise or approximate location from GPS or the network. The Android app blocks location permissions entirely.
- Advertising identifiers, device fingerprints, or any cross-app or cross-site tracking.
- Card, UPI or bank account details. Payments for the yearly pass are handled by Razorpay; we never see or store them.
- Aadhaar, PAN or any government ID.
- Biometric data for identification. Voice recordings are used only to turn speech into text and are never used to identify you.

## 5. Why we use your data

| Purpose | Data used | Basis under the DPDP Act | Your choice |
|---|---|---|---|
| Make your kundali and show today's panchang and vrat calendar (on your phone) | Birth details, panchang city | Your consent ("Make my kundali") | Required for the app to work; you can delete it at any time |
| Answer your chart questions | Question, chart facts, answer language | Your consent, given each time you ask | Ask only what you want to ask |
| Answer questions of faith (the Doubt desk) | Question, answer language. No chart | Your consent, given each time you ask | As above |
| Save your questions so later answers fit you | Questions, answers, recent conversation | Your consent ("Save my questions") | Optional, off until you turn it on |
| Daily panchang and vrat alerts | Panchang city or birth place, on the phone | Your consent ("Daily panchang and transit alerts") | Optional, off until you turn it on |

| Purpose | Data used | Basis under the DPDP Act | Your choice |
|---|---|---|---|
| Keep and read family members' charts | Family members' details; their chart facts when you ask | Your consent ("Keep family members' charts") and your confirmation that you have their permission or are their parent or guardian | Optional, off until you turn it on |
| Kundli matching | Partner's birth details on the phone; partner's chart facts and scores when you ask | Your confirmation that you have the partner's permission | Only when you start a match |
| Spoken questions | Voice recording | Your consent, given each time you tap the mic, and the phone's microphone permission | Optional; typing works the same |
| Read answers aloud | Answer text | Your consent, given each time you tap Read aloud | Optional |
| Show the helpline when a question suggests distress, and add a professional-advice note to health, legal, money and exam questions | Question text, checked automatically and not stored | Part of answering safely; legitimate use for safety | Always on, for your protection |
| Keep the Services secure, prevent misuse and fix faults | Technical data and logs | Legitimate uses permitted by Section 7 of the DPDP Act, and legal obligations | Needed to run the Services |
| Reply to you and handle requests and grievances | Your email and message | Your consent, given when you write to us, and legal obligations | Only if you write to us |
| Sell the yearly pass, confirm it, restore it on another device, handle refunds, and keep accounts | The payment record from Razorpay; the email and payment ID you enter to restore a pass | Data you give voluntarily for this purpose (Section 7(a) of the DPDP Act), and legal obligations under tax and accounting law | Only if you buy a pass |
| Count free answers fairly | The free-answer counter on your device; a daily-changing hash of your IP address | Your use of the free answers (Section 7(a) of the DPDP Act), and preventing misuse | Needed for free answers |
| Comply with law, court orders and lawful requests | Only what the law requires | Legal obligation | Required by law |

We do **not** use personal data for advertising, for building a profile of you, for selling or renting to anyone, for decisions that have legal or similar effects on you, or to train artificial-intelligence models.

## 6. Consent and how to withdraw it

- **Notice before consent.** Before you enter birth details, the app lists each purpose on its own line, in your language, with the data it uses. The full notice (this policy) is one tap away.
- **Itemised and off by default.** Only "Make my kundali" is required. Every other purpose is a separate switch that starts off. "Only what's required" is offered beside "Agree to selected", at the same size.
- **Age first.** The app asks whether you are 18 or older before anything else (see section 14).
- **Withdraw as easily as you gave.** Privacy repeats every switch. Turning one off takes effect immediately and deletes what was kept under it: saved questions are erased, family charts are erased, and scheduled alerts are cancelled.
- **Withdrawing the required consent** means deleting your data with "Delete my account and data" or uninstalling the app. Withdrawal does not affect processing that took place before it.
- **Consent records.** The app records which purposes you agreed to and when, on your phone, so it can show you your choices.
- **Consent Managers.** Registration of Consent Managers under the DPDP Rules began on 13 November 2026. If we connect Vedharish to a registered Consent Manager, we will name it here, and you will be able to give, review and withdraw consent through it too.

## 7. AI-generated answers and automated checks

- Answers are written by an artificial-intelligence language model provided by Anthropic (see section 8). The model receives your question, the chart facts and our written rules for answering safely and respectfully. Each answer shows the chart facts it relied on.
- No person at Vedharish reads your questions or answers during normal operation. We see a question only if you choose to send it to us, for example to report a problem.
- Before any answer is written, the question is checked automatically on your phone and on our server. If it suggests distress or self-harm, the app shows the Tele-MANAS helpline instead of an answer. We do not record that this happened and we do not contact anyone.
- Questions about health, legal matters, money, investments or exams are labelled with a note advising a qualified professional.
- Answers are guidance. They are not decisions about you, and they are not used to make any decision about you.
- Our AI and speech providers have committed not to use what we send them to train their models (see section 8).

## 8. Who we share data with

We share personal data only with service providers that process it for us under contract (Data Processors), only for the purposes in this policy, and only the minimum they need.

| Provider | What they receive | Why | Where | Their handling |
|---|---|---|---|---|
| **Anthropic, PBC** (Claude AI models) | Question, chart facts, answer language; when relevant the recent conversation, a family member's or partner's chart facts, match scores and a relation word | To write the answer | United States | Under Anthropic's commercial terms, API data is not used to train its models. Inputs and outputs are deleted from its systems within 30 days, unless they are kept longer for safety review of flagged content or because the law requires it |
| **Sarvam AI** (Axonwise Private Limited, Bengaluru) | Voice recordings (for speech-to-text); answer text (for read-aloud) | To turn speech into text and text into speech in Indian languages | India | Sarvam states that API inputs are not used for training and that its speech-to-text API deletes data after processing unless retention is requested. We do not request retention |
| **DigitalOcean, LLC** (App Platform) | All requests to our servers pass through its systems, plus server logs | To run the web app and our answer, voice and read-aloud servers | India (Bangalore) | Processes data only on our instructions |
| **GoDaddy** (Websites + Marketing) | Records of visits to vedharish.com, and cookies described in section 17 | To build and host our website | GoDaddy's data centres | Hosts the site for us; any cookies or visit statistics it adds are covered by GoDaddy's own privacy notice |
| **GoDaddy (Professional Email)** | Emails you send to hello@vayura.ai or girish@vayura.ai | To receive and answer your messages | GoDaddy's data centres, which may be outside India | Processes data only on our instructions |
| **Razorpay Software Private Limited** | When you buy a pass: your email, phone number, name if given, payment details and the amount. When you restore a pass: the payment ID we check | To take payment by UPI, card, net banking or wallet, send your receipt, and process refunds | India | Handles payment data under the Reserve Bank of India's rules and its own privacy policy, and keeps payment records as the law requires |
| **Google Fonts** (web app and website) | Your IP address and browser details, when your browser loads our typefaces | To display Indian-language typefaces | Google's servers | Governed by Google's privacy policy. The phone app bundles its fonts and does not contact Google for them |

**Independent services you use with Vedharish.** Google Play and the Apple App Store handle the download and updates of the app, and payment when you buy the yearly pass inside the phone app, under their own policies; they may also collect data such as crash reports. For an in-app purchase, the app sends the store's signed purchase record to our server, which checks it and keeps nothing; we receive only summary sales and download statistics from the stores. If the server voice is unavailable, read-aloud uses your phone's own text-to-speech engine, which works under your phone maker's terms. Calls to Tele-MANAS 14416 or 112 are made by your phone's dialler; we are not told about them.

**Authorities.** We disclose personal data to government agencies, courts or regulators only when Indian law requires it, and only what is required. Where the law allows, we will tell you.

**Business transfers.** If Vedharish merges with or is acquired by another organisation, personal data may pass to it only under the same protections as this policy. We will tell you before that happens.

**We never share personal data with** advertisers, data brokers, astrologers, temples, puja or remedy sellers, matchmaking services, or anyone who would use it for marketing.

## 9. Processing outside India

Our servers (DigitalOcean, Bangalore), our speech provider and the data on your device are in India. Answers are written by Anthropic, whose systems are in the United States, so the question and chart facts for each answer are processed there. Emails you send us are handled by our email provider, GoDaddy, whose data centres may be outside India. Section 16 of the DPDP Act allows such transfers except to countries the Government of India restricts by notification. If the United States, or the country of any other provider, is ever restricted, we will stop that transfer. We protect transfers with encryption in transit, by sending no names or birth details, and through our provider's contractual commitments.

## 10. How long we keep data

| Data | How long |
|---|---|
| Birth details, charts, settings and consent record | On your phone until you change or delete them, use "Delete my account and data", or uninstall the app |
| Saved questions and answers | On your phone, the latest 50, while "Save my questions" is on. Erased when you switch it off or tap "Clear question history" |
| Family members' charts | On your phone while "Keep family members' charts" is on. Erased when you remove a chart or switch the option off |
| A partner's details for matching | In memory until you close the app or start a new match |
| Questions, chart facts and answers on our servers | Not stored. Held in memory only while the answer is being written |
| Questions and chart facts with our AI provider | Deleted within 30 days, except as described in section 8 |
| Voice recordings | Not stored by us. Deleted after transcription |

| Data | How long |
|---|---|
| Read-aloud audio | Up to 10 minutes in our server's memory, then deleted |
| IP addresses used to apply usage limits | Up to 24 hours in memory, only as a one-way hash that changes every day |
| Server and security logs (no question, answer or audio content) | For the period Indian law requires and then deleted: 180 days under the CERT-In Directions now, and at least one year once the DPDP Rules require it from 13 May 2027 |
| Payment records for the yearly pass (with Razorpay and in our accounts) | For as long as tax and accounting laws require, currently up to 8 years, and then deleted |
| Your pass, on your device | Until it ends, or until you use "Delete my account and data" (you can restore it later with your payment ID) |
| Free-answer counter, on your device | Kept after "Delete my account and data" so that free answers are not reset. It holds nothing about you |
| Emails, rights requests and grievances | While we deal with them, and then for one year so that we can show how we handled them, unless the law requires longer |
| Japa counts and goals, on your device | Until you reset them or use "Delete my account and data" |
| Early-access emails sent through the website | Until we invite you when the app launches, or sooner if you ask us to delete yours |

Because Vedharish has no accounts, we keep nothing that would need deleting after a period of inactivity. If that changes, we will give you at least 48 hours' notice before erasing data, as the DPDP Rules require.

**Payment records and erasure.** If you ask us to erase your data, we delete everything we can. We cannot erase payment records that tax and accounting laws require us to keep; we keep them only for that purpose and for refunds and disputes.

## 11. How we protect data

- All traffic between the app or website and our servers is encrypted (HTTPS/TLS 1.2 or later).
- Our servers keep questions, answers and audio in memory only and never write them to disk or logs.
- Access to our systems is limited to people who need it, uses multi-factor authentication, and is logged.
- Our service providers are bound by contracts that require security safeguards and use of data only on our instructions.
- Rate limits and monitoring protect the Services against abuse.
- On your phone, Vedharish data is kept in the app's private storage, which other apps cannot read. It is protected by your phone's own lock and encryption, but it is not separately encrypted by the app, and anyone who can unlock your phone and open Vedharish can see it. Please use a screen lock.

- In the web app, data is kept in your browser's storage for app.vedharish.com. Anyone who uses the same browser profile can see it. On a shared computer, use a private window or tap "Delete my account and data" when you finish.
- We review these safeguards regularly and keep an incident-response plan.

No system is perfectly secure. If you believe your data or our Services are at risk, write to girish@vayura.ai.

## 12. If a data breach happens

If a personal data breach happens, we will:

- tell affected users without delay, in plain language and in their language where we can, through the app, the website and email where we have it. We will say what happened, what data was involved, the likely consequences, what we are doing, and what you can do to protect yourself;
- inform the Data Protection Board of India without delay, and send it a detailed report within 72 hours, as the DPDP Rules require; and
- report the incident to CERT-In within 6 hours of noticing it, as the CERT-In Directions require.

## 13. Your rights and how to use them

Under the DPDP Act (sections 11 to 14) and the SPDI Rules, you have the right to:

- **Access**: a summary of the personal data we process about you, how we process it, and who we have shared it with;
- **Correction, completion and updating** of personal data that is inaccurate or incomplete;
- **Erasure** of personal data that is no longer needed for its purpose, unless the law requires us to keep it;
- **Withdraw consent** at any time, as easily as you gave it;
- **Grievance redressal**: a reply from our Grievance Officer to any complaint about how your data is handled; and
- **Nominate** another person to exercise your rights if you die or become unable to act.

**In the app**, most of these take a few taps, because your data is on your phone:

| You want to... | Where |
|---|---|
| See or correct your birth details | Kundali → Edit birth details |
| Remove a family member's chart | Kundali → choose the member → Remove this chart |
| Erase saved questions | Privacy → Clear question history |
| Withdraw any optional consent | Privacy → Your choices |
| Erase everything | Privacy → Delete my account and data (or uninstall the app) |

**By email**: write to girish@vayura.ai with the subject "Privacy request" and tell us what you would like. Because we keep no accounts, we usually hold nothing that identifies you. To help us find anything we may have, such as emails you sent us, write from the same email address, and mention the approximate dates. We will never ask for your

birth details or an ID document to handle a request. To nominate someone, send us their name and contact details; we will record the nomination and act on it when needed, as the law allows.

**Timelines.** We acknowledge requests within 48 hours and resolve them within 30 days. Under the DPDP Rules, we will never take more than 90 days. Using your rights is free.

**Your duties.** Section 15 of the DPDP Act asks everyone using these rights to follow the law, not to impersonate another person, not to hide material information or give false details, and not to file false or frivolous complaints. The Act provides a penalty of up to ₹10,000 for breaching these duties.

## 14. Children and persons with disabilities

- Vedharish is for people aged **18 or older**. The app asks for age first. A person under 18 cannot continue and is asked to involve a parent or guardian.
- A **parent or lawful guardian** may add a child's chart as a family member. By doing so they give consent as the child's parent or guardian, which the DPDP Act requires. The child's details stay on the parent's phone.
- We do not track or monitor children's behaviour, and we do not direct advertising at children. We do not do these things for anyone.
- Where an adult with a disability has a **lawful guardian**, the guardian gives consent on their behalf.
- If we learn that a child's data reached us without a parent's consent, we will delete it.
- Please do not use kundli matching for anyone below the legal age of marriage in India.

## 15. Family members and partners

When you add a family member's or partner's birth details, you confirm in the app that you have their permission, or that you are their parent or lawful guardian. Their details stay on your phone. Questions about them send only their chart facts and a relation word, never their name or birth details. If a family member asks you to remove their chart, please do so in the app; we do not hold it. They can also write to our Grievance Officer at any time.

## 16. Phone permissions

| Permission | Why | When |
|---|---|---|
| Microphone | To record a spoken question | Only while you are recording, after you allow it |
| Notifications | For morning panchang and vrat alerts | Only if you turn alerts on |
| Internet | To fetch answers, transcription and read-aloud audio | When you use those features |

Vedharish does not ask for location, contacts, camera, photos, files, phone or SMS permissions. You can withdraw any permission in your phone's settings. In the web app, your browser asks for the microphone only when you tap the mic, and morning alerts are not offered.

## 17. Cookies and similar technologies

The phone app and the web app at app.vedharish.com use no cookies, no analytics and no advertising or tracking technologies. The web app keeps your data in your browser's local storage, as section 3 explains; it stays on your

device and is not sent to us.

Our website, vedharish.com, is built and hosted with GoDaddy Websites + Marketing. GoDaddy may set cookies needed to run the site and, if site statistics are switched on, cookies that count visits. Where it does, the website shows a cookie banner so that you can choose. We do not add advertising tags to the website. The web app and the website load typefaces from Google Fonts (section 8).

## 18. Grievance Officer and contact

**Grievance Officer and person responsible for data protection**

Girish Rawat, Business Analyst
Vayura Global Ventures LLP
55, Westend Marg, Lane-2, Saidulajab, Saket, Delhi – 110030, India (near Saket Metro Station)
Email: girish@vayura.ai
Phone: +91 85880 40119 (Monday to Friday, 9:30 am to 6:30 pm IST)

We acknowledge every grievance within 48 hours and resolve it within 30 days, and never later than 90 days. If you are not satisfied with our response, or do not receive one in time, you may complain to the **Data Protection Board of India** in the manner it prescribes. Under section 13(3) of the DPDP Act, you must first use our grievance process before approaching the Board.

For anything else: hello@vayura.ai.

## 19. Changes to this policy

We will update this policy when the Services or the law change. We will show the new version in the app and on this page, and tell you what changed. If a change means using your data for a new purpose, we will ask for your consent first. The version history below lists every change.

| Version | Date | What changed |
|---|---|---|
| 2.4 | 19 November 2026 | Added our office and postal address in Saket, Delhi, including for the Grievance Officer. |
| 2.3 | 19 November 2026 | Named Vayura Global Ventures LLP as the Data Fiduciary, with its LLPIN, registered office and Grievance Officer. Added japa counts (kept only on your device), mantra recordings, and GoDaddy as our email provider. |
| 2.1 | 19 November 2026 | Added the web app at app.vedharish.com, browser storage, DigitalOcean hosting in Bangalore, GoDaddy as website host, and daily usage limits. |
| 2.2 | 19 November 2026 | Added the yearly pass: payments through Razorpay, the payment record we keep for tax law, the pass and free-answer counter kept on your device, and restoring a pass on another device. |

| Version | Date | What changed |
|---|---|---|
| 2.0 | 18 November 2026 | Rewritten to describe the app as built: no accounts, no stored questions. Added family charts, the Doubt desk, read-aloud, the vrat calendar and the processor list. Removed sharing with astrologers, which Vedharish does not offer. |
| 1.0 | November 2026 | First draft, published with the website. |

## 20. Definitions

- **Personal data**: any data about an individual who can be identified by or from that data.
- **Data Principal**: the individual the personal data relates to. For a child, this includes the parent; for a person with a disability, their lawful guardian.
- **Data Fiduciary**: whoever decides why and how personal data is processed. Here, that is Vedharish.
- **Data Processor**: a person or company that processes personal data on behalf of a Data Fiduciary.
- **Chart facts**: the summary of your chart that the app sends with a question, such as planet positions, signs, houses, nakshatras, dashas and divisional-chart signs, without your name or birth details.
- **Consent Manager**: a company registered with the Data Protection Board through which you can give, manage, review and withdraw consent.
- **Board**: the Data Protection Board of India set up under the DPDP Act.
